

# VacoStick™

## Integral Reagent Urine Test Stick & Test Tube

### Saves time and money

- under 60-second screening for point of care (POC) use
- reduces glove, urine cup and tests consumption
- cup usable for microbiological, microscopic, or chemical tests

### Easy to use

- minimal training required
- quick, automatic operation
- no opening containers or dipping test strips

### Safe and convenient

- protects you and your staff from contamination
- no need to touch the urine stream or a wet stick

Urine collection combined with stick  
Fast, simple, cost-effective, safe

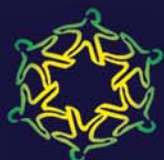

### VacoStick Features

- screening by color changes upon visual inspection or by VacoStick Digital Analyzer
- fast, clean, sterile urine collection and POC screening
- can be used with BD Vacutainer, Greiner, or Agit Urine Cups
- automatic, one-step evacuation of low volumes (1cc) directly from the closed urine cup, eliminating manual dipping
- no need to open VacoStick test tube or Urine Cup
- patient ID bar code included —tie samples to patients' test results
- CE and AMAR (Israel Medical Product Certification) Certified; ISO 13485 Certified facility
